### Extruded

### Fascia Wrap / Dock

### Eyebrow

**ENGINEERING:** Supported by an optional framework of outriggers, clevis rods and hat and channel trusses, PCG overhead canopy systems are certified by licensed professional engineers to comply with local and state building codes.

**CONNECTIONS:** Overhead canopies are available in mechanically fastened or welded connection systems. Both systems provide greater structural integrity and unique aesthetic appearances.

**FINISHES:** Our overhead canopy finishes include mill finish, powder coating, Kynar/Hylar, standard enamel and anodized. Select a color from the standard PCG color chart or a custom color to match the specific requirements of your building project.

**LEED:** PCG will work with you to optimize our overhead canopy systems to create a sustainable design that promotes a higher standard of energy efficiency.

**GUARANTEE:** All overhead canopy systems include an industry standard warranty. PCG overhead canopies are guaranteed to be free from defects in materials and workmanship during the extent of this period.

**CUSTOM:** We specialize in custom designed overhead canopy solutions with quality materials and craftsmanship to meet your unique project requirements. Let us create a custom overhead canopy for your specifications!
