ENGINEERING: Typically supported by a framework of posts, beams and/or trusses to create the span desired, PCG walkway canopy systems are certified by licensed professional engineers to comply with local and state building codes.

CONNECTIONS: Walkway canopies are available in mechanically fastened or welded connection systems. Both systems provide greater structural integrity and unique aesthetic appearances.

FINISHES: Our walkway canopy finishes include mill finish, powder coating, Kynar/Hylar, standard enamel and anodized. Select a color from the standard PCG color chart or a custom color to match the specific requirements of your building project.

LEED: PCG will work with you to optimize our walkway canopy systems to create a sustainable design that promotes a higher standard of energy efficiency.

GUARANTEE: All walkway canopy systems include an industry standard warranty. PCG walkway canopies are guaranteed to be free from defects in materials and workmanship during the extent of this period.

CUSTOM: We specialize in custom designed walkway canopy solutions with quality materials and craftsmanship to meet your unique project requirements. Let us create the canopy system that you want!
